

How to search for “non-qualifying” CARES cases.

The screenshot shows the top navigation bar of the eCares software. The menu items are Home, Setup, eCares (with a dropdown arrow), Reports (with a dropdown arrow), and Log Out. The 'eCares' item is highlighted with a yellow circle. Below the menu, a blue link says "Click here to view calls to review to be de-identified." The main content area is titled "Cares Search". It features a "Filter:" dropdown menu where "Non-Traumatic CARES Cases" is selected. This dropdown is also circled in yellow. Below it is a "Search" button. Further down, there is a "Date of Arrest:" section with dropdown menus for "All" and "From/Through" dates, and a help icon.

Start by clicking “eCares” in the top menu bar.

This screenshot shows the same "Cares Search" interface as above, but the "Filter:" dropdown menu is now open, revealing a list of options. The options include "Non-Traumatic CARES Cases" (which is still highlighted in blue), "Presumed Cardiac CARES Cases", "Non-Traumatic CARES Cases", "Utstein Arrests", "List of Survivors", "Dispatch Data", and "No Filter". The "No Filter" option is currently selected and highlighted in blue. The rest of the interface remains the same, with the "Search" button and date selection fields visible.

Next, Select the drop-down menu for “Filters”. “Non-Traumatic CARES Cases” is the default filter.

Then, select “No Filter” to show all of the cases and results entered

Cares Search

Filter: No Filter

Search

Date of Arrest:

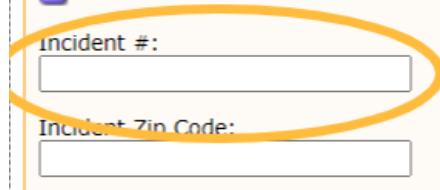

All From: [] Through: []

Incident #: []

Booklet ID: []

Incident Zip Code: []

Patient First Name: []

Note This must be done after changing the filter, the filter will reset to default after the search.

Enter the provided Incident # and then click “search”.
